Paint Protection and Scratch Remover

Automotive

NR.1

Heavy Cut - Heavy Scratch Remover - Orbital + Rotary

It is an ideal product to remove heavy scratches, moiré and holograms on paint. Due to the micro abrasives it contains, it acts as a polish while removing deep scratches and provides a hologram-free, deep and bright surface in a short time. Due to its high level of aluminum oxide additive formula, it is processed very quickly with its special sponge without heating on the surface and it is absolutely dust-free. Orbital and Rotary can be studied. You save time and oxidation removal and high gloss in one application. It provides almost zero dust and easy wiping opportunity at suitable environment and surface temperature. Thanks to its late drying feature, it can be used comfortably in larger areas. It removes sanding marks of 1200 grit and above. It can be used with all paint types including scratch resistant hard paints. It does not contain filler and silicone. For the orbital machine; Maximum abrasive with Lamb felt or Gray sponge.

pH : 7-8

Dosage : Ready to use

Packaging : 1L -20L - 200L

NR.2

Medium Cut - Moir & Hologram Remover - Orbital + Rotary

It is an ideal product to remove heavy scratches, moiré and holograms on paint. Thanks to the micro abrasives it contains, it acts as a polish while removing deep scratches and provides a hologram-free, deep and bright surface in a short time. Thanks to its high level of aluminum oxide additive formula, it is processed very quickly with its special sponge without heating on the surface and it is absolutely dust-free. Orbital and Rotary can be studied.

You save time thanks to scratch, oxidation removal and high gloss in one application. It provides almost zero dust and easy wiping opportunity at suitable environment and surface temperature. Thanks to its late drying feature, it can be used comfortably in larger areas. Removes sandpaper marks of 1500 grit and above. It can be used with all paint types including scratch resistant hard paints. It does not contain filler and silicone. For the orbital machine; It is maximum abrasive with Lamb Pad or Maroon sponge.

NR.3

Fine Finish Polish - Hare & Hologram - Orbital + Rotary

Fine scratches on the paint, holograms and fluctuations in dark colors are completely eliminated. It gives color depth, professional high gloss and reflection to the surfaces. It prevents dullness in the paint for a long time. It can be used to remove minor imperfections and polish painted plastic surfaces and vehicle headlights. It is the ideal finish product for removing fine scratches and holograms and cleaning the paint before protective wax in new vehicles. Thanks to its high performance formula, it extends the life of the ceramic when the vehicle surface is treated before ceramic. Due to its fine scratch removal, hologram, oxidation removal, high gloss and late drying feature, it can be used in wider areas. It removes sandpaper marks of 3000 grit and above. It can be used with all paint types, including scratch resistant hard paints. It does not contain fillers and silicone.
